Portfolio: my-portfolio-mike-dev1.vercel.app

PROFESSIONAL SUMMARY

BSIT graduate (Web and Mobile Application Development) and full-stack developer who built the award-winning capstone platform that tracks performance for 200+ students. Experienced in databases, admin dashboards, role-based accounts, and record-tracking systems, with a strong documentation habit from internship and team projects. Quick to learn new tools and processes, and comfortable working with non-technical stakeholders in both development and IT support roles.

TECHNICAL SKILLS

- Languages: JavaScript, TypeScript, PHP, Java, HTML, CSS, Dart, Python, C#, C++
- Frameworks & Libraries: React, Next.js, Node.js, Flutter, Tailwind CSS, Bootstrap, OpenCart (Twig), Django
- Databases: MySQL, PostgreSQL, Supabase, Firebase, SQLite, Microsoft SQL Server | CRUD Operations, Record Management
- Office & Documentation: Microsoft Word, Microsoft Excel, Data Entry, Report Preparation, Record Keeping
- Tools: Git, GitHub, Vercel, VS Code | REST API Integration, OpenAI API
- Hardware & IT Support: PC/printer setup and troubleshooting, basic OS and network configuration, software installation/maintenance
- Professional Skills: Technical Documentation, Progress Reporting, Task Tracking, Clear Written and Verbal Communication, Teamwork with Non-Technical Stakeholders, Fast Learner of New Systems and SOPs, Attention to Detail

WORK EXPERIENCE

Front-End Developer Intern - SMESoft Inc. Dec 2025 – Mar 2026

- Developed responsive user interfaces for an e-commerce platform, ensuring consistent layout and functionality across desktop and mobile devices.
- Built new features from team and stakeholder requirements, from UI components to interactive elements.
- Designed and integrated custom icons and visual assets to improve interface clarity and user experience.
- Documented every development task and presented progress in team meetings, updating task status after stakeholder approval to keep a clear, auditable project record.

Freelance Developer - Self-Employed 2024 – 2025

- Built custom software projects for student clients from their written requirements, handling both front-end and back-end work.
- Implemented project features using HTML, CSS, JavaScript, PHP, Java, and MySQL, depending on each project's needs.
- Planned tasks, tracked deadlines, and delivered completed work according to agreed requirements.

RELEVANT PROJECTS

FireQuake Escape: Disaster Preparedness Training Game (Capstone Project, Best Capstone Award) 2025

HTML, CSS, JavaScript, PHP, MySQL, Tailwind CSS, Bootstrap

- Built the web platform and admin panel for a disaster-response capstone combining a 3D mobile game with a companion website.
- Implemented role-based accounts (Admin, Staff, and Student), each with tailored access to section and performance data.
- Automated performance tracking for 200+ students, allowing evaluators to quickly view, filter, and organize results by student and section.

Café Crème: Coffee Shop Ordering & Management System 2024

HTML, CSS, JavaScript, PHP, MySQL

- Built a full-featured ordering and management web app with separate customer and admin interfaces.
- Admin side: Point-of-Sale (POS) system, inventory management, product management, and stock tracking.
- Added adjustable UI theming and data filtering across all major modules for faster searching and reporting.

TaskFlow: AI-Assisted Task & Note Management Web App 2026

Next.js, React, TypeScript, Node.js, Supabase, OpenAI API

- Built a task management app with duplicate-detection and automated due-date/urgency tracking to keep large record sets organized and easy to search.

Pocketra: Personal Budget & Wallet Management App 2026

Flutter, Dart, Firebase

- Developed a finance app that lets users divide and track balances across custom sections, with real-time totals and per-section logging.

EDUCATION

Bachelor of Science in Information Technology 2022 – 2026

- Bulacan State University, Bustos Campus
- Specialization: Web and Mobile Application Development
- Awarded Best Capstone Project
