WORK EXPERIENCE

Front-End Developer Intern - E-commerce Website Project

Dec 2025 – Mar 2026

- Developed and customized responsive front-end pages using OpenCart (Twig), HTML, CSS, JavaScript, Tailwind CSS, and Bootstrap while collaborating with backend developers through GitHub.
 - Improved user interface consistency and workflow efficiency by completing daily tasks, contributing to documentation, and supporting smooth system integration within the development team
-

PROJECTS

Watch & Coffee Shop Management Systems (HTML, CSS, JavaScript, PHP, MySQL) – Front-End Developer / Full-Stack Contributor 2024

- Developed responsive web interfaces for both a watch and coffee shop system, enabling product browsing, ordering, POS, and account management features,
- Improved user experience and system functionality by implementing organized layouts, responsive design, and integrated customer and admin features simulating real-world operations,

FireQuakeEscape (Best Capstone Project) – Web Developer

2025

- Developed the web system and admin panel for a 3D evacuation simulation game with account management and performance tracking features.
- Automated performance calculations for each student, each section, and overall, improving evaluation efficiency by 100% and allowing staff to quickly monitor over 200 students' progress.

TaskFlow – Task Management SaaS (Next.js, React, Supabase, OpenAI) – Full-Stack Developer

2026

- Built full-stack task management app with real-time database synchronization, section-based organization, and secure Supabase authentication with responsive UI.
- Developed AI-powered task title enhancement using NLP techniques (typo correction, auto-capitalization) and intelligent chatbot that reads all user tasks to process natural language queries and surface actionable insights via OpenAI API.

AskAI – AI Chat Assistant (Python, Flask, Groq API) – Full-Stack Developer

2026

- Built a full-stack AI chat application with real-time responses using Python, Flask, and LLaMA 3.3 70B via Groq API.
- Implemented multi-turn conversation memory and secure API key management using environment variables.

Pocketra – Budget Tracker Mobile App (Flutter, Firebase) – Full-Stack Developer

2026

- Built a full-stack mobile budget tracking app for iOS and Android using Flutter and Firebase, featuring real-time balance updates, offline support, and secure authentication with Firebase Auth (Email/Password and Google Sign-In).
 - Developed a pocket-based budgeting system with Cloud Firestore integration, enabling users to create spending categories, track expenses, monitor balances, and sync data seamlessly across devices in real time.
-

CERTIFICATIONS AND TRAINING

- Cisco Networking Academy - Introduction to Packet Tracer
 - Student Internship Orientation - Bulacan State University
-

TECHNICAL SKILLS

Web Development: HTML, CSS, JavaScript, React.js, Next.js, PHP, Tailwind CSS, Bootstrap, Flutter
Backend & Database: Node.js, PHP, Firebase, Supabase, MySQL, SQLite
Programming Languages: Java, Python, JavaScript, C#
Tools & Platforms: GitHub, Git, Vercel, XAMPP, Postman, JSON, REST APIs
Mobile & Game Development: Flutter, Unity 2D/3D

EDUCATION

2022 - 2026

Bachelor of Science in Information Technology
BULACAN STATE UNIVERSITY - BUSTOS CAMPUS (Graduating)
Specialization: Web and Mobile Application Development
