Portfolio: my-portfolio-mike-dev1.vercel.app

PROFESSIONAL SUMMARY

IT graduate and full-stack developer with hands-on experience building and maintaining data-driven systems, including databases, admin dashboards, role-based accounts, and record-tracking tools. Comfortable learning new platforms, tools, and structured processes quickly, with a strong documentation habit built from internship and team-based project work. Adaptable, detail-oriented, and dependable in both technical and support-focused roles.

TECHNICAL SKILLS

- Languages: HTML, CSS, JavaScript, TypeScript, PHP, Dart, C#, C++, Python, Java
- Frameworks & Libraries: React, Next.js, Node.js, Tailwind CSS, Bootstrap, Flutter, OpenCart (Twig), Django
- Databases & Records Systems: MySQL, SQLite, PostgreSQL, Supabase, Firebase
- Tools: Git, GitHub, Vercel, VS Code
- Other: REST API Integration, OpenAI API
- Hardware & Support: PC/printer setup and troubleshooting, basic OS and network configuration, software installation and maintenance
- Soft Skills: Clear written and verbal communication, documentation and reporting, teamwork with non-technical stakeholders, fast learner of new systems, workflows, and SOPs, attention to detail

WORK EXPERIENCE

Front-End Developer Intern: E-Commerce Website Project Dec 2025 – Mar 2026

- Developed and implemented responsive user interfaces for an e-commerce platform, ensuring consistent layout and functionality across desktop and mobile devices.
- Built new features based on team and stakeholder requirements, from UI components to interactive elements.
- Designed and integrated custom icons and visual assets to improve interface clarity and overall user experience.
- Documented each development task and presented progress during team meetings, updating task status upon stakeholder approval. This helped maintain a clear, auditable record of project progress.

RELEVANT PROJECTS

Café Crème: Coffee Shop Ordering & Management System 2024

HTML, CSS, JavaScript, PHP, MySQL

- Built a full-featured ordering and management web app with separate customer and admin interfaces.
- Admin side: Point-of-Sale (POS) system, inventory management, product management, and stock tracking.
- Added adjustable UI theming and data filtering across all major modules for faster searching and reporting.

FireQuake Escape: Disaster Preparedness Training Game (Capstone Project) 2025

HTML, CSS, JavaScript, PHP, MySQL, Tailwind CSS, Bootstrap

- Built the web platform and admin panel for a disaster-response capstone combining a 3D mobile game with a companion website.
- Implemented role-based accounts (Admin, Staff, and Student), each with tailored access to section and performance data.
- Automated performance tracking for 200+ students, allowing evaluators to quickly view, filter, and organize results by student and section

TaskFlow: AI-Assisted Task & Note Management Web App 2026

Next.js, React, TypeScript, Node.js, Supabase, OpenAI API

- Built a task management app with duplicate-detection and automated due-date/urgency tracking to keep large record sets organized and easy to search.

Pocketra: Personal Budget & Wallet Management App 2026

Flutter, Dart, Firebase

- Developed a finance app that lets users divide and track balances across custom sections, with real-time totals and per-section logging.

EDUCATION

Bachelor of Science in Information Technology 2022 – 2026

- Bulacan State University, Bustos Campus
- Specialization: Web and Mobile Application Development
- Awarded Best Capstone Project
